

Dear Software,

We need to talk.

It's Not You, It's Your Dependencies

Baggage 1: OSS Licenses

✨ ✨ ✨ It's FREE! ✨ ✨ ✨

*infected main business asset whose code is
now public*

Baggage 2: Security Risks

✨✨ The community is super active! ✨✨
*core component maintained by a girl during
her school holidays*

Baggage 3: Vibe Coding

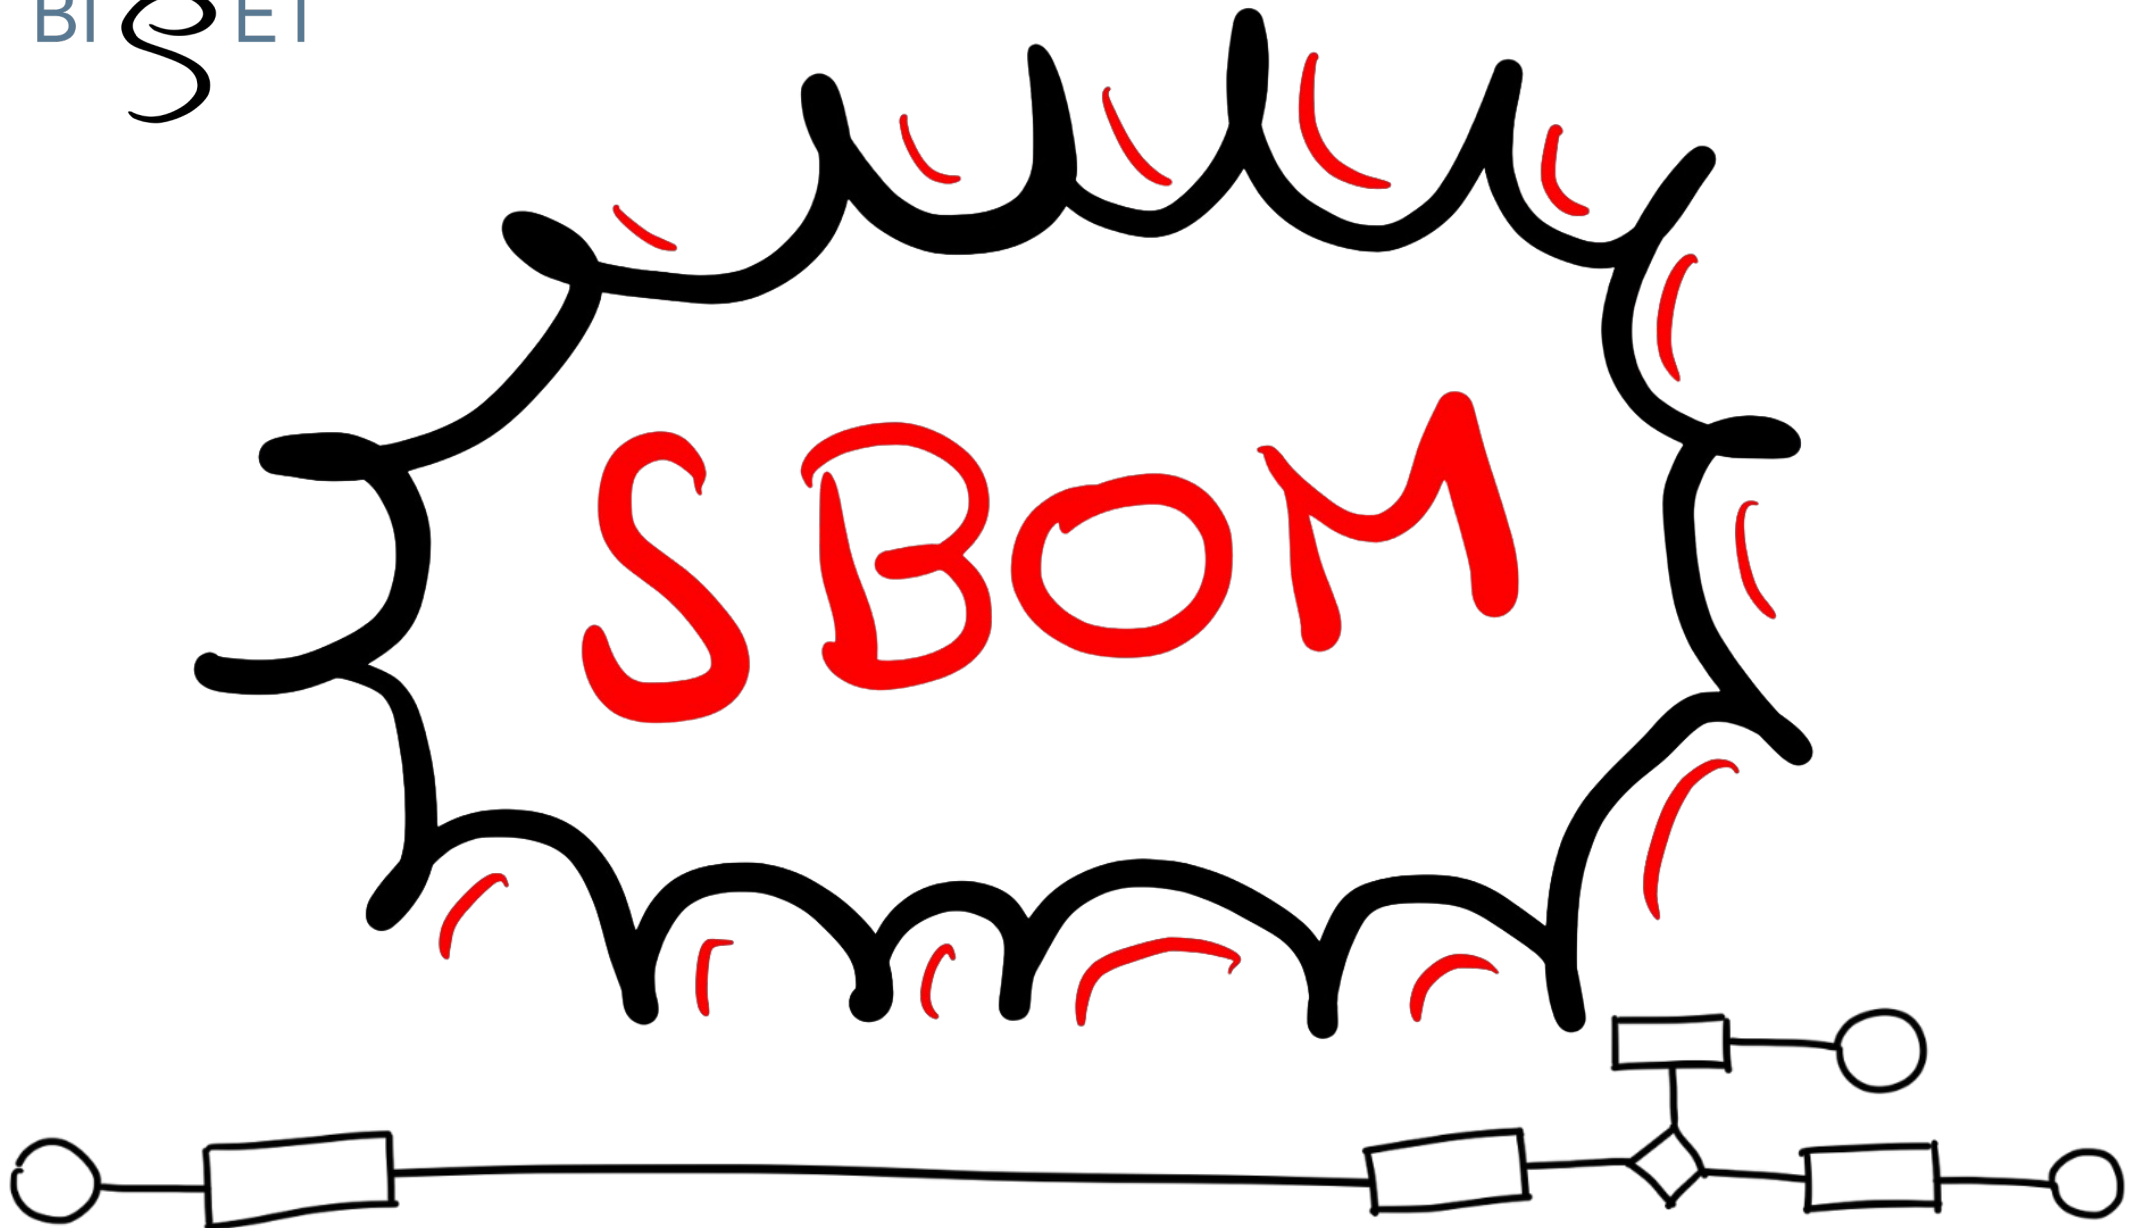

✨✨ We don't need coders with AI. ✨✨
*no source for output which violated
copyright*

Therapy To Fix Commitment Issues

BI § ET

It's what's on the inside

- Using package managers
- Documenting Components (version, license)
- Document risks and manage updates
- Check dependencies and technical implemetation
- Note how the component is used (internally or in customer software)
- Company guidelines on OSS licenses
- Rules on vibe coding
- No copy+pasting of code!

Katharina Bisset

I deal with IT law
so you can take care of tech.
